History & Mission:
The Department of Energy Organization Act of 1977 created one of the most interesting and diverse agencies in the Federal government. Activated on October 1, 1977, the twelfth cabinet-level department brought together for the first time within one agency two programmatic traditions that had long coexisted within the Federal establishment: 1) defense responsibilities that included the design, construction, and testing of nuclear weapons dating from the Manhattan Project effort to build the atomic bomb, and 2) a loosely knit amalgamation of energy-related programs scattered throughout the Federal government.

The mission is to advance the national, economic, and energy security of the United States; to promote scientific and technological innovation in support of that mission; and to ensure the environmental cleanup of the national nuclear weapons complex. The Department's strategic goals to achieve the mission are designed to deliver results along five strategic themes:

1. Energy Security: Promoting America’s energy security through reliable, clean, and affordable energy
2. Nuclear Security: Ensuring America’s nuclear security
3. Scientific Discovery and Innovation: Strengthening U.S. scientific discovery, economic competitiveness, and improving quality of life through innovations in science and technology
4. Environmental Responsibility: Protecting the environment by providing a responsible resolution to the environmental legacy of nuclear weapons production
5. Management Excellence: Enabling the mission through sound management

Director: Rick Perry
Department: Department of Energy (DOE)
Maryland Employees: 1,038
Procurement Contracts in 2017:
- $28,241,188,442 US Total
- $275,797,129 Performed in Maryland
Maryland Facilities

Department of Energy: Germantown*

History & Mission: The first permanent headquarters for the Atomic Energy Commission (AEC) was in Washington, D.C. A bill to relocate the AEC headquarters received Congressional approval in 1955. Construction of a new facility began in Germantown on May 29, 1956 and was completed by November 1958. In 1974, the AEC became part of the Energy Research and Development Administration (ERDA). In 1977, ERDA became part of the Department of Energy which continues to occupy the Germantown site. Although DOE’s headquarters are located in Washington, D.C., the Germantown facility now operates as an administration complex for the DOE headquarters. The DOE Germantown facility is an annex for many administrative operations and offices.

Offices

| Logistics Operations |
|---|---|---|

Federal Facilities Profile

Department of Energy (DOE)

Office of Project Assessment
The Office of Project Assessment provides independent advice to the Director of the Office of Science (SC) relating to those activities essential to constructing and operating major research facilities. In addition, this office provides professional management and staff support regarding these functions to SC program offices.

http://science.energy.gov/opa

Germantown Facility
Steve Meador, Associate Director
301-903-4840
Stephen.meador@science.doe.gov

Office of Basic Energy Sciences
Basic Energy Sciences (BES) supports fundamental research to understand, predict, and ultimately control matter and energy at the electronic, atomic, and molecular levels in order to provide the foundations for new energy technologies and to support DOE missions in energy, environment, and national security.

http://science.energy.gov/bes/

Germantown Facility
Dr. Harriet Kung, Director
301-903-6594
Harriet.kung@science.doe.gov

Office of Biological and Environmental Research
BER research advances understanding of the roles of Earth’s biogeochemical systems (the atmosphere, land, oceans, sea ice, and subsurface) in determining climate so we can predict climate decades or centuries into the future, information needed to plan for future energy and resource needs.

http://science.energy.gov/ber/

Germantown Facility
Dr. Sharlene Weatherwax, Associate Director
301-903-3251
Sharlene.weatherwax@science.doe.gov
Office of Advanced Scientific Computing Research

The mission of the Advanced Scientific Computing Research (ASCR) program is to discover, develop, and deploy computational and networking capabilities to analyze, model, simulate, and predict complex phenomena important to the Department of Energy (DOE).

http://science.energy.gov/ascr/

Germantown Facility  
Steve Binkley, Director  
301-903-7486  
Steve.binkley@science.doe.gov

Office of Fusion Energy Services

The FES program mission is to expand the fundamental understanding of matter at very high temperatures and densities and to build the scientific foundation needed to develop a fusion energy source.

http://science.energy.gov/fes/

Germantown Facility  
Dr. Edmund Synakowski, Associate Director  
301-903-4941  
Ed.synakowski@science.doe.gov

Office of High Energy Physics

The mission of the High Energy Physics (HEP) program is to understand how our universe works at its most fundamental level. To enable these discoveries, HEP supports theoretical and experimental research in both elementary particle physics and fundamental accelerator science and technology.

http://science.energy.gov/hep/

Germantown Facility  
Dr. Jim Siegrist, Associate Director  
301-903-3624  
Jim.siegrist@science.doe.gov
Office of Nuclear Physics

The mission of the Nuclear Physics (NP) program is to discover, explore, and understand all forms of nuclear matter. NP supports experimental and theoretical research - along with the development and operation of particle accelerators and advanced technologies - to create, detect, and describe the different forms and complexities of nuclear matter that can exist in the universe, including those that are no longer found naturally.
