Director: RDML Tim Gallaudet, Ph.D., USN Ret.
Department: Department of Commerce (DOC)

Maryland Employees: 2,913

Procurement Contracts in 2017:

- \$1,240,971,128 US Total
- \$519,417,515 Performed in Maryland

History & Mission: NOAA's roots date back to 1807, when the United States' first scientific agency, the Survey of the Coast, was established. The Weather Bureau was formed in 1870, and the Bureau of Commercial Fisheries in 1871. In 1956, the National Weather Bureau, then part of the Environmental Science Services Administration (ESSA), established its communications center in the Suitland Federal Center. In 1965, ESSA became part of the Department of Commerce, incorporating the Weather Bureau and several other agencies; ESSA became NOAA in 1970. Home of NOAA headquarters since 1993, the NOAA Silver Spring Metro Center consists of four buildings, a science center and an auditorium.

NOAA's dedicated scientists use cutting-edge research and high-tech instrumentation to predict changes in the oceanic and atmospheric environments and living marine resources, and to provide related data, information, and services to the public, industry, the research community, and other government agencies. These efforts range from warnings of severe events on short time-scales to information on climate shifts over decades or more.

NOAA's mission is to understand and predict changes in Earth's environment and conserve and manage coastal and marine resources to meet our nation's economic, social, and environmental needs. An international leader on scientific and environmental matters, NOAA envisions an informed society that uses a comprehensive understanding of the role of the oceans, coasts, and atmosphere in the global ecosystem to make the best social and economic decisions.

National Marine Fisheries Service (NMFS)

NOAA Fisheries is responsible for the stewardship of the nation's ocean resources and their habitat. We provide vital services for the nation: productive and sustainable fisheries, safe sources of seafood, the recovery and conservation of protected resources, and healthy ecosystems—all backed by sound science and an ecosystem-based approach to management.

Federal Facilities Profile

National Oceanic and Atmospheric Administration (NOAA)

Cooperative Oxford Laboratory

The Cooperative Oxford Laboratory brings together the combined missions and resources of the Maryland Department of Natural Resources, NOAA and USCG in assessing the trends and factors affecting the ecosystem health of Chesapeake Bay. The laboratory, administered by NOS, and its research programs operate as an integrated Division of CCEHBR with research facilities in Charleston, SC and Oxford, providing a greater diversity of scientific expertise. Oxford researchers collaborate with scientists nationally and internationally to improve the understanding of aquatic animal health and to develop ecosystem-based management strategies to prevent and mitigate diseases in fish and shellfish.

Federal Facilities Profile

National Oceanic and Atmospheric Administration (NOAA)

NOAA Chesapeake Bay Office (NCBO)

The NOAA Chesapeake Bay Office (NCBO) was established in 1992 to provide a focus for NOAA's multiple capabilities and activities in the Chesapeake Bay and with the multi-state/federal partnership that comprises the Chesapeake Bay Program (CBP), administered by the EPA. The main NCBO office is co-located with the CBP in Annapolis, and its staff coordinate and collaborate with CBP partners on a daily basis. NOAA has been a federal partner of the Chesapeake Bay Program since the signing of a memorandum of agreement with EPA in 1984.

The NOAA Chesapeake Bay Office works to help protect and restore the Chesapeake Bay through its programs in fisheries management, habitat restoration, coastal observations, and education, and represents NOAA in the Chesapeake Bay Program, a unique regional partnership that has led and directed the restoration of the Chesapeake Bay since 1983.
