TRANSPORTATION

Maryland is centered in one of the nation's most comprehensive transportation networks along the eastern seaboard.

Highways: Maryland offers a safe, efficient network of interstate roads; I-68, I-70, I-81, I-83, I-95, I-97, I-195, I-270, I-370, I-395, I-495, I-695, I-795, and I-895.

Rail: Served primarily by CSX Transportation and Norfolk Southern Railway; six additional short line or terminal freight railroads provide service mainly in rural areas of the state.

Mass Transit: State-owned rail commuter service (MARC) in the Baltimore-Washington area; metropolitan light rail in the Baltimore area, and subway systems in Baltimore and the Washington, D.C. suburbs. Amtrak passenger rail offers convenient access to U.S. cities in the Northeast, and Metroliner service connects Baltimore to New York in 2-1/2 hours.

Truck: 1,530 local and long-distance trucking establishments transport general or specialized cargo.

Water: Port of Baltimore is located closer to the Midwest than any other Atlantic seaport; a leading U.S. automobile port and one of the nation's top RO-RO ports; state-of-the-art Seagirt Marine Terminal and Intermodal Container Transfer Facility provide convenient, economical access to national and international markets; one of only four ports on the East Coast able to accommodate super Post-Panamax ships.

Air: Maryland is as close by air to London as it is to Los Angeles; Baltimore/Washington International Thurgood Marshall Airport (BWI), the state's major commercial airport, provides nonstop service to 84 domestic and overseas destinations and is served by 36 airlines, including commuter, charter and cargo; passenger flights to and from BWI average over 680 daily. BWI offers a full array of cargo support services, including 24-hour air cargo and customs services, a 395,000 square foot Air Cargo Center and a 214-acre Foreign-Trade Zone. A light rail line connects BWI's international terminal with Baltimore City and its northern suburbs, and Amtrak and MARC train service are available to Washington, D.C.

UTILITIES

Electricity: Electricity in Maryland is available and dependable; the state's major electric utilities are part of the PJM Interconnection, the country's largest and most integrated power pool. The amount of power available at any particular place varies, but the 13 electric utilities that serve Maryland provide ample power on demand. Customers of investor-owned utilities and major cooperatives may choose their electric supplier.

Gas: Natural gas is available in most urban and surrounding areas. Maryland receives bulk natural gas from five interstate pipelines: Transco, Columbia Gas, Dominion Energy, Texas Eastern, and Eastern Shore Natural Gas. Seven natural gas companies operate in Maryland, as well as two companies which supply propane gas through street mains. Customers of major gas companies may choose their gas supplier.

Telecommunications: Heavily served by digital and fiber optics, the state's telecommunications network is state-of-the-art. Verizon Maryland is the largest provider of communications services in the state; its fiber network infrastructure is very robust with nearly 18,000 fiber miles. Verizon services include FTTP, FiOS, Business Ethernet and Secure Gateway. Other major providers include Comcast, Level 3 and XO Communications.
