**Secretary:** Xavier Becerra

**Department:** Department of Health and Human Services (HHS)

**Maryland Employees:** 39,861

**History & Mission:** The Department of Health and Human Services (HHS) is the United States government's principal agency for protecting the health of all Americans and providing essential human services, especially for those who are least able to help themselves. The department includes more than 300 programs, covering a wide spectrum of activities.

HHS represents almost a quarter of all federal outlays, and it administers more grant dollars than all other federal agencies combined. HHS' Medicare program is the nation's largest health insurer, handling more than 1 billion claims per year. Medicare and Medicaid together provide health care insurance for one in four Americans.

HHS works closely with state and local governments, and many HHS-funded services are provided at the local level by state or county agencies, or through private sector grantees. The Department's programs are administered by 11 operating divisions, including eight agencies in the U.S. Public Health Service and three human services agencies. In addition to the services they deliver, the HHS programs provide for equitable treatment of beneficiaries nationwide, and they enable the collection of national health and other data.

## Health Resources and Services Administration

---

HRSA is the primary federal agency for improving health care to people who are geographically isolated, economically or medically vulnerable. HRSA programs help those in need of high-quality primary health care, people with HIV/AIDS, pregnant women, and mothers. HRSA also supports the training of health professionals, the distribution of providers to areas where they are needed most and improvements in health care delivery.
