Best Practices for Businesses to Reopen

MARINAS

• Develop a plan or checklist for reopening consistent with CDC guidance that includes:
  – Employee training.
  – Leave policies, absenteeism, plans and employee screenings.
  – Facial covering requirements for guests and employees.
  – Physical facility evaluation for any damage or issues caused by vacancy. Follow CDC and Maryland Department of the Environment guidance on reopening buildings, including checking mechanical, air and water/ice systems. Ensure all water lines are flushed, including equipment water lines and connections, according to manufacturer’s instructions. Ensure building ventilation meets appropriate standards.
  – Social distancing protocols and procedures for employees, vendors, and guests, with special consideration for entrances and exits, queues, bottlenecks, facility layouts and safe capacity limits.
  – Communications and signage.
  – Routine and frequent environmental cleaning and disinfecting, especially high-touch surfaces, in accordance with CDC recommendations.
• Develop a plan for vendors to bring products safely into the business by arranging for deliveries when there are the fewest guests and employees.

• Connect with State and local authorities to ensure that all licenses and inspections are up-to-date prior to opening.
• Facility capacity may be limited based upon Executive Order or other local government guidance.
• If the marina also has a restaurant, bar, retail, or pool, these are subject to additional requirements under Executive Orders and, in some cases, State and local regulation or requirements.

• Employees and customers should continue to wear facial coverings while working in areas open to the general public and areas in which interactions with other staff are likely, especially when boats are launched or hauled.
• Fueling and pump out should be done with wearing a mask and gloves. All surfaces will be sanitized after each use.

• Minimize congregating in common areas through signage, barriers, and employee communications. Restrict access to areas where social distancing and social gathering requirements cannot be followed.
• Install a marking system to visually demonstrate the recommended social distancing with special emphasis on locations where guests and employees congregate, such as pump out station, launch and haul out areas, parking lot, wharf or dock area.
• Designate and post signage including the direction of foot traffic in main circulation paths and stairways, consider one-way circulation routes. Be mindful of creating situations that might cause lines and crowds.
• Post signage advising customers to not enter the marina if they are sick or symptomatic.
• Where possible, maintain admissions records for at least 2 weeks to assist if contact tracing is required.
Best Practices for Businesses to Reopen
MARINAS

All Executive Orders still in effect must be complied with. See most up to date orders here: governor.maryland.gov/covid-19-pandemic-orders-and-guidance.

• Increase cleaning and disinfecting, especially frequently touched surfaces, in accordance with CDC guidelines. Areas and amenities that cannot be easily cleaned should remain closed.

• Make hand sanitizer, disinfecting wipes, soap and water, or similar disinfectant readily available to employees and guests, particularly at key guest and employee entrances and contact areas such as pier gates, restrooms, guest lockers, checkout counters, and other areas where guests and employees are likely to congregate.

• Where possible, implement and encourage touchless payment.

• Require face coverings, including for children older than 9 years of age if appropriate, when interacting with employees and guests particularly if social distancing cannot be assured.

• Post signage advising guests to not enter the property if they are sick or symptomatic.

• Technicians thoroughly sanitize the vessels that they work on before starting and after each job is completed.

OPEN FOR CLEANLINESS AND COMFORT

OPEN FOR COMMUNICATIONS

• Communicate commitment to cleanliness by posting compliance adherence with the CDC’s guidelines, including social distancing, handwashing, cough and sneeze hygiene, cleaning and disinfection, and staying home when ill.

• Show guests care by having signage that details social distancing protocol and COVID-19 prevention. Provide signage in Spanish and other languages prevalent in your community.

• Communicate with employees and guests on the measures taken for their comfort and on the shared responsibility to monitor their health and stay home if not feeling well.

• Prior to the guest’s visit, if possible, explain processes in place for their comfort, which includes social distancing, and increased hygiene practices per the CDC and MDH guidance and that you are open for business.
