Commanding General: Brigadier General Anthony McQueen
Command: U.S. Army Medical Research and Development Command

History & Mission: The U.S. Army Medical Research and Development Command (USAMRDC) is the Army's medical materiel developer, with responsibility for medical research, development, and acquisition and medical logistics management. The USAMRDC's expertise in these critical areas helps establish and maintain the capabilities the Army needs to fight and win on the battlefield. Ensuring our armed forces remain in optimal health and are equipped to protect themselves from disease and injury, particularly on the battlefield, is the job of the Command. The Command is headquartered at Fort Detrick, MD, with 12 subordinate commands located throughout the world. The Command is staffed with highly qualified scientists, program managers, logisticians, contracting experts, and support personnel. The critical expertise in these areas ensures we have the medical capabilities the Army needs to fight and win on the battlefield. Overall, about 7,100 military, civilian, and contractor personnel are assigned to support the headquarters and subordinate units. Officers, enlisted Soldiers, and civilians-many of whom are among the most respected and knowledgeable specialists in their fields-provide subject matter expertise in medical, scientific, and technical areas throughout the Command. Medical information and products developed by the USAMRDC protect and sustain the health and safety of the force through deployment and combat.

Subordinate Commands

- U.S. Army Aeromedical Research Laboratory (USAARL)
- U.S. Army Institute of Surgical Research (USAISR)
- U.S. Army Medical Materiel Development Activity (USAMMDA)
- U.S. Army Medical Research Acquisition Activity (USAMRAA)
- U.S. Army Medical Research Institute of Chemical Defense (USAMRICD)
- U.S. Army Medical Research Institute of Infectious Diseases (USAMRIID)
- U.S. Army Research Institute of Environmental Medicine (USARIEM)
- Telemedicine and Advanced Technology Research Center (TATRC)
- Walter Reed Army Institute of Research (WRAIR)

Associated Laboratories

Telemedicine and Advanced Technology Research Center (TATRC)

TATRC, a subordinate element of the United States Army Research and Materiel Command (USAMRDC), is charged with managing core Research Development Test and Evaluation (RDT&E) and congressionally mandated projects in telemedicine and advanced medical technologies. To support its research and development efforts, TATRC maintains a productive mix of partnerships with federal, academic, and commercial organizations. TATRC also provides short duration, technical support (as directed) to federal and defense agencies; develops, evaluates, and demonstrates new technologies and concepts; and conducts market surveillance with a focus on leveraging emerging technologies in healthcare and healthcare support. Ultimately, TATRC's activities strive to make medical care and services more accessible to soldiers, sailors, marines, and airmen; reduce costs, and enhance the overall quality of military healthcare.

U.S. Army Medical Research Institute of Infectious Diseases

Since 1969, USAMRIID has served as the Department of Defense's (DoD) lead laboratory for medical biological defense research. While our core mission is to protect the warfighter from biological threats, we also investigate disease outbreaks and threats to public health. Research conducted at USAMRIID leads to medical solutions—therapeutics, vaccines, diagnostics, and information—that benefit both military personnel and civilians. USAMRIID is a subordinate laboratory of the U.S. Army Medical Research and Development Command.
