NOTE: Items above in red contain projected data. Data is taken from applications or letters of intent (LOI) for tax credits submitted by the production companies. Final numbers are determined once the production is complete and final documentation, including an independent audit, is submitted and reviewed by DBED.

NOTE: New multiplier in effect as of January 1, 2014. Previous film industry analyses calculated a multiplier of 2.17 to estimate the total effect that film industry spending has on the Maryland economy. The most recent study calculated a slightly lower multiplier of 1.7. Both of these multipliers were calculated using IMPLAN, an industry-recognized economic modeling software package. The revised multiplier was calculated using updated IMPLAN data.
